SAGE | The Data Space for a Sustainable Green Europe

This project has received co-funding from the Digital Europe Programme (DIGITAL) under grant agreement N° 101195471.

SAGE - USE CASES

Building Environment
CO₂

Global Environmental
Exposure

Soil Circularity

Nature and Ecosystem
Services

Textile Circularity

Air Quality and Health

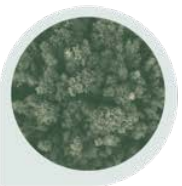

Forest Data Space

Pollinator Monitoring

Zero Defect
Manufacturing

Remote Sensing for
National Forest
Inventories

SAGE - VISION

To build a Sustainable Green
Europe Data Space
for secure and reliable sharing
of environmental data

SAGE will establish a fully operational Green Deal Data Space (GDDS) aimed at enhancing the accessibility, integration, and utilization of environmental data to support key pillars of the European Green Deal - zero pollution, biodiversity, climate adaptation and circular economy

SAGE targets these strategic pillars by implementing a rich portfolio of use cases in each of them.

The SAGE platform and related operating and governance entities will be established on a sustainable basis and continue to operate after the SAGE project finishes in early 2028.

SAGE - ABOUT

SAGE | The Data Space for a Sustainable Green Europe

- Consortium: 40+ partners
- Duration: 3 years
- Funding : DEP 50% funding
- Total budget: €16 million
- EC Funding: €8 million
- Start: March 2025
- End: March 2028

SAGE - CONSORTIUM

40+ PARTNERS IN 13 COUNTRIES
